RESPONSE TO EXAMINER'S RESTRICTION REQUIREMENT

In the Office Action dated October 2, 2001, designated as Paper No. 4 in the above-captioned application, the Examiner issued a Restriction Requirement identifying the following groups of claims as being drawn to potentially distinct inventions:

Group I. Claims 1 - 33, drawn to a method, classified in class 427, subclass 163; Group II. Claims 34 - 49, drawn to a product, classified in class 350, subclass 96.34.

The Examiner asserted that these inventions may be regarded as independent and distinct from one another because the product as claimed can be made by another and materially different process such as the step of removing the protective layer after subsequent processing of the intermediate product.

The undersigned attorney of record has made a provisional election to Group I, claims 1-33, without traverse.

Applicants believe that a one (1) month extension of time is necessary to make this Response timely. Should Applicants be in error, Applicants respectfully request the Office grant such time extension pursuant to 37 C.F.R. § 1.136(a) as necessary to make this Response timely, and hereby authorizes the Office to charge any necessary fee or surcharge
